SCIENCE MEETS ART: MY EXPERIENCE AS A SCIENTIFIC ILLUSTRATOR

An essential part of any scientific journey is communicating your findings to other scientists and to the public, sparking into them a tiny bit of the passion that inspired you throughout your research. I have always been fond of visual communication and since 2020 I have been combining my scientific education with my love for drawing in the creation of unconventional, science-inspired illustrations

As a molecular biologist, I am fascinated by the mechanisms underlying cell function. As a scientific illustrator, I love to imagine these mechanisms and bring them to life with unusual images and colours, aiming to find novel, engaging ways to communicate biology.
