TRENTO

Prenota un posto!

NEED HELP?

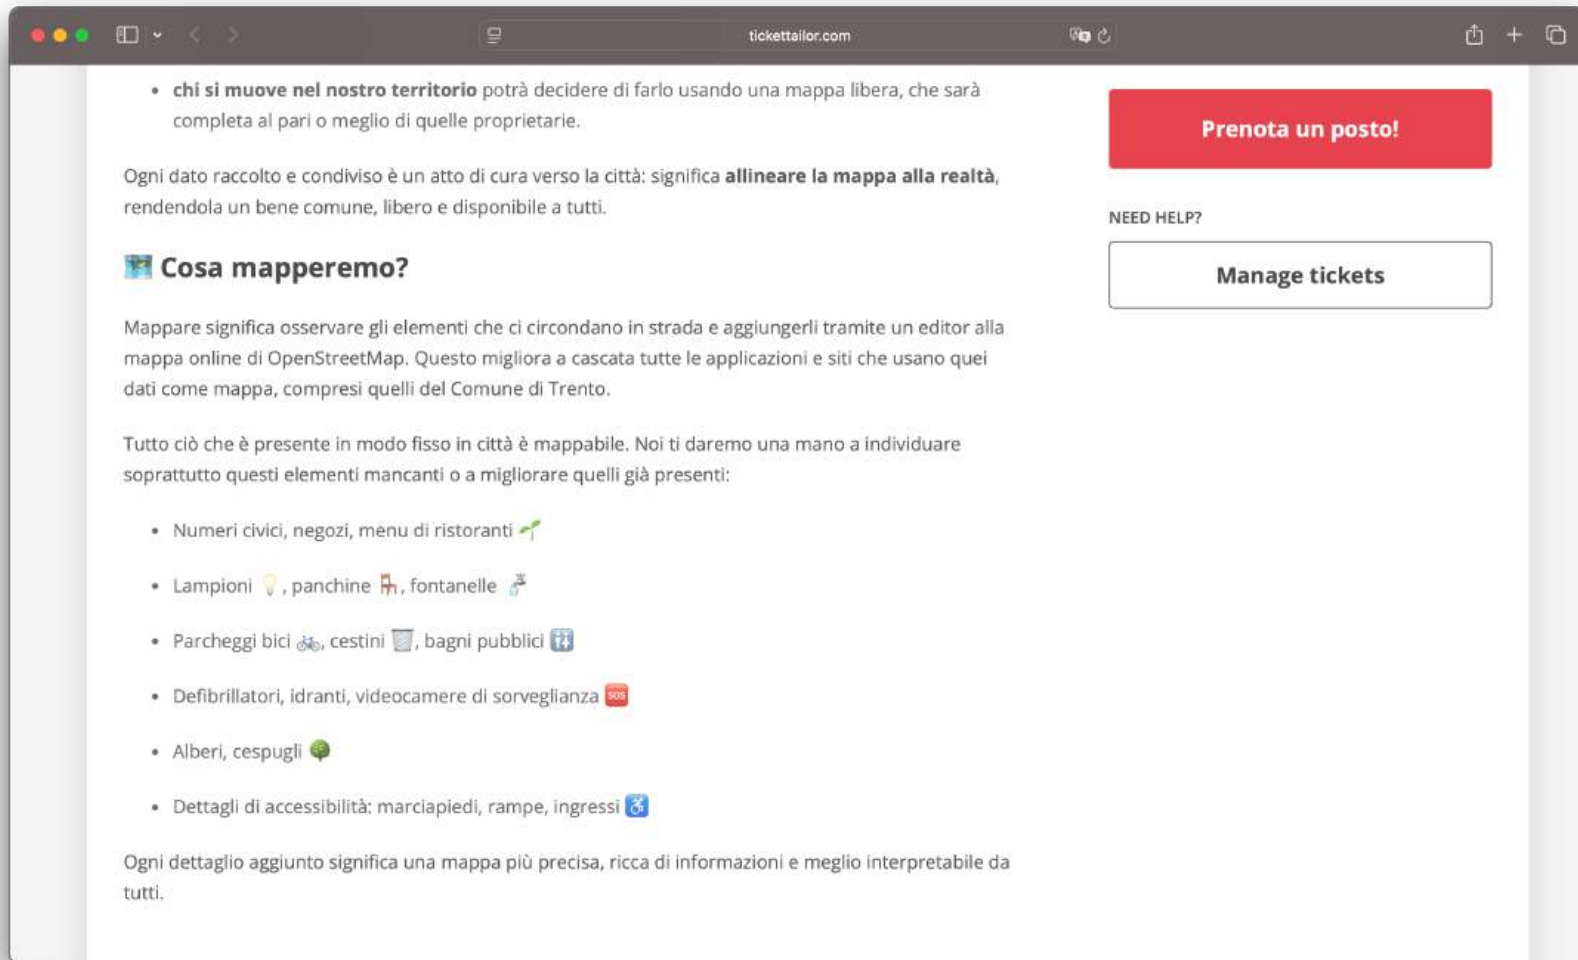

📍 Impact Hub Trentino, Via Roberto da Sanseverino, 95, 38122 Trento TN

Vuoi dare il tuo contributo per rendere **Trento una delle città meglio mappate al mondo su OpenStreetMap** (la Wikipedia delle mappe)?

Partecipa al **Mapping Party** organizzato da **Speck&Tech**: un pomeriggio all'aperto, camminando per le vie dei quartieri e delle circoscrizioni di Trento alla ricerca di tutti quei dettagli che ancora mancano in mappa.

Non serve esperienza, basta uno smartphone e la voglia di scoprire la città da un nuovo punto di vista!

Manage tickets

Programma

- **14:00 puntuali – Impact Hub**

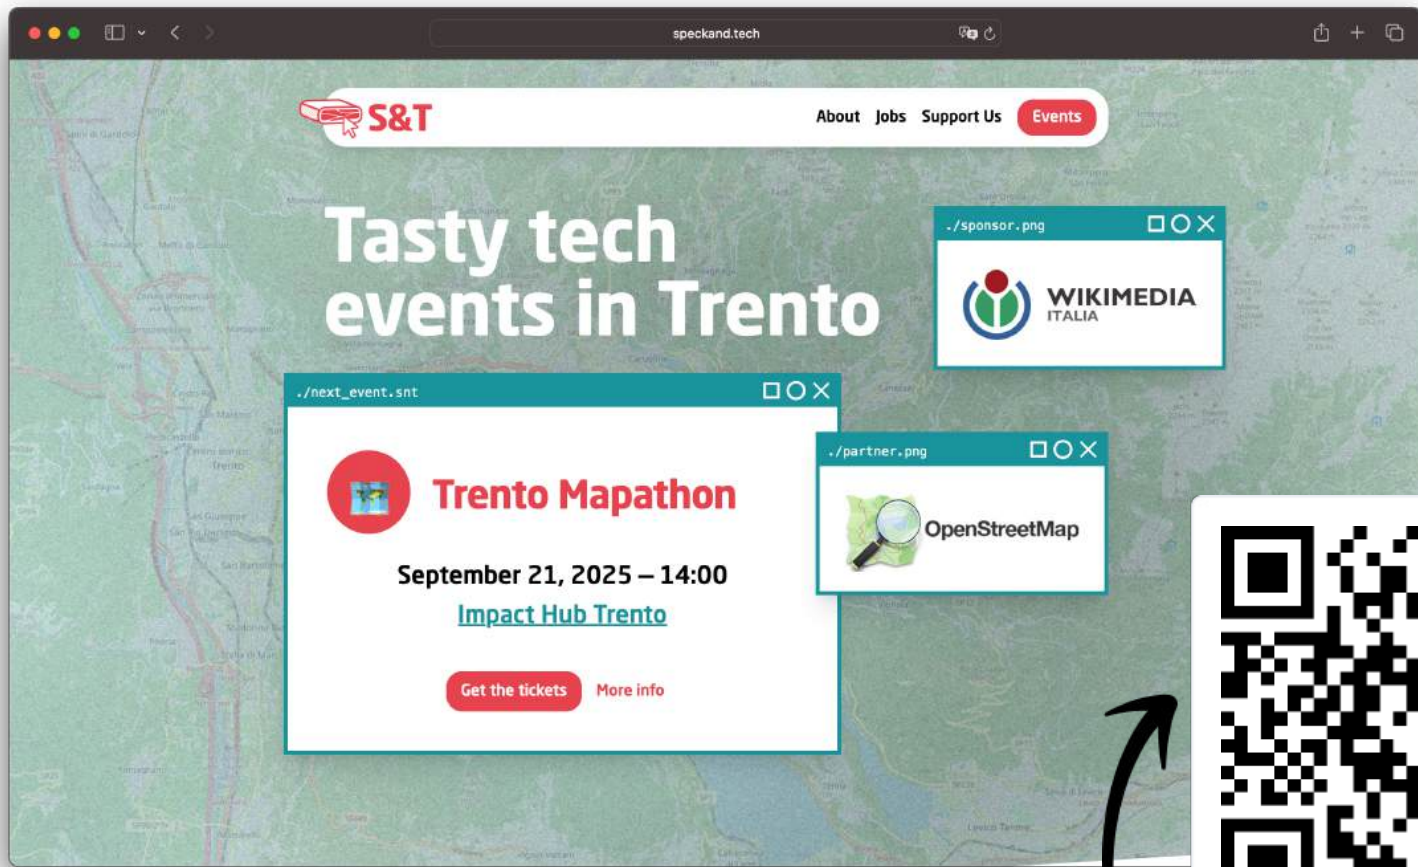

Rapida formazione su come fare a mappare il territorio e organizzazione delle squadre per zona. Puoi partecipare coi tuoi amici oppure in una delle squadre create sul momento, conoscendo nuove persone. Ti daremo tutte le istruzioni e un **kit merenda (offerto da noi!)**.

- **15:00-18:00 – Mapathon**

Inizia la Mapathon! Le squadre si spostano nei quartieri assegnati, camminando e raccogliendo dati sul campo per aggiungerli a OpenStreetMap.

- **18:30 – Impact Hub**

Torniamo ad Impact Hub per vedere e festeggiare i risultati: statistiche, confronti e la nostra **Hall of Fame**  per ogni categoria. Ci godremo poi un momento di networking in pieno stile Speck&Tech con birrette, speck e alternative per ogni dieta, per condividere assieme pensieri sulla giornata e conoscerci meglio!

74 (A)I, Robot April 9

73 Non è un gioco da ragazze March 25

72 Oltre l'atmosfera February 27

71 Where is my mind January 29

Predicting the unpredictable: re-engineering recommendation algorithms for freedom, society, and money

James J. Brusseau, Professor in the Philosophy Department @ [Pace University New York](#)

Recommendation algorithms capture us in our established interests and preferences. How can they be re-engineered to provoke new interests and curiosities? What ethical, social, and economic benefits result from recommendations that are engaging despite being unfamiliar?
