

2025

THE GENERAL PRINCIPLES OF OPEN SCIENCE

The seminar series addresses the fundamental themes that underpin the **open science movement**.

These topics are relevant across different disciplines and provide a foundation for more specific in-depth studies in various sectors

Interdisciplinary Training Activity Proposal for PhD courses

Delivery method: online, in English language

Module 1

Tuesday 25th November 2025, 14.30 - 16.30 CULTURAL FOUNDATIONS OF OPEN SCIENCE

Giorgia Bincoletto

Module 2

Tuesday 2nd December 2025, 14.30 - 16.30 PUBLISHING IN OPEN ACCESS

Francesca Valentini and the University's Scientific Publications Office

Module 3

Wednesday 3rd December 2025, 14.30 - 16.30 IRIS INSTITUTIONAL REPOSITORY FOR PUBLICATIONS AND DOCTORAL THESES

Francesca Valentini

Module 4

Thursday 11th December 2025, 14.30 - 16.30 RESPONSIBLE RESEARCH DATA MANAGEMENT

Vincenzo Maltese and Nikolett Kis

Module 5

Friday 12th December 2025, 14.30 - 16.30 DATA MANAGEMENT PLAN

Vincenzo Maltese and Nikolett Kis

This module is dedicated to the theoretical and ethical foundations of the open science movement, in the context of the universities' growing commitment of the Third Mission.

This module is dedicated to open access and how it relates to publications, focusing particularly on the requirements of European research projects and the ways to comply with them while respecting copyright law.

This module is dedicated to the procedure of uploading publications and doctoral theses, also in open access, to the IRIS institutional repository.

This module is dedicated to the responsible research data management, with particular attention to regulations, university guidelines and the requirements of Horizon Europe.

Building on Module 4, this module is dedicated to the more operational aspects of responsible research data management, with a specific focus on the FAIR principles and the Data Management Plan.
