

**UNIVERSITÀ  
DI TRENTO**

FROM OUR ANONIMOUS SURVEYS...

### **CELL Winter 2026**

Intense and Fascinating experiences with students from all around the world including tours, night cultures, and also academic collaborations. Enjoy!

Had such a wonderful time learning with student of varied backgrounds in science. The planned excursions to the lake and museums were gorgeous and so culturally rich.

This Winter School is perfect for people who want to see and learn new things, and in the meantime get to know more people. It has everything - interesting lectures about important topics, hikes in the snow, museum visits, parties, food, and lovely people. You have to do this at least once in your lifetime!

It was an amazing Experience, we made lots of Friends and also I used to not like Python and now i like it and looking forward to Model some Proteins!

Such a great opportunity to connect with like-minded international students and professors! Winter School not only deepened my knowledge in science, but also allowed me to learn about different cultures and experiences!

In a short space of time, the participants were able to gain exposure to a wide range of fields and simulation and visualization tools, which is expected to be useful for their future research.

This was the first time ever being outside of my country and coming for two weeks to a winter school in Trento was very enjoyable. Everyone was very welcoming and there were a surprising amount of English-speaking locals in Trento so even if you're Italian needs a lot of work, I would still encourage you to come to Trento.

It was way better than my expectations.

Perfetto!! 所有的一切如童话一样美好和完美!!

I got to interact with a lot of interesting people from various background. Fun!

I really enjoyed my time here

Erasmus Trento winter school was one of the best experiences in my life

This was a great experience full of knowledge and good people

Trento was an amazing town to do academic work in. It is nice and cozy, yet it has everything that one might need.

It was my first time in Italy and I would not want it any other way.

Don't hesitate to come to Trento!

This was an amazing eye-opening experience! My first Erasmus/Winter School abroad and it honestly changed my life. Met so many amazing, friendly, admirable people - among staff and international students - who shared their love for science with me. The experience cannot be repeated, but I trully wish that everyone could get at least a little bit of the adventures and excitement we got with such a wonderful company.
