● ● TARGETED THERAPEUTICS

Dario Neri is a prominent chemist and biotechnology leader serving as CEO and CSO of the Swiss-Italian **biotech company Philoken**, while retaining his title as **full professor of Biomacromolecules at ETH Zürich**.

Educated at the Scuola Normale Superiore of Pisa, he completed his PhD and post-doctoral research under Nobel laureates Kurt Wüthrich and Sir Gregory Winter. His cutting-edge research focuses on **engineering therapeutic cancer antibodies** and **developing DNA-encoded chemical libraries**, successfully advancing two antibody products into Phase III clinical trials.

An internationally recognized authority with **over 500 peer-reviewed publications**, his contributions have earned him numerous prestigious honors, including an **ERC Advanced Grant** and the **Pratesi Medal of the Italian Chemical Society**.
