Safety at DISI

Leonardo Lizzi
DISI Safety Delegate

Why Safety Matters to DISI Students

- **Equal Status under Italian Law (D.Lgs. 81/08):** During lab sessions and practical activities, students are legally classified as workers.
- **Mandatory Requirement:** Safety training is essential to attend lab classes, access research facilities, and participate in student part-time jobs ("150 hours").
- **DISI Study Plan:** Every degree program has a specific training plan composed of General Training and Specific Training (Low, Medium, or High Risk).

Course 1 – General Safety Training

- **Requirement:** Mandatory for any activity, even temporary, on university premises.
- **Format & Duration:** 4 hours, self-paced online course on Moodle; available in Italian and English.
- **Certificate & Validity:** Final multiple-choice test on Moodle. Permanent validity (does not expire) and recognized as a permanent credit in the job market.
- **Prior Training Credit:** If you already hold a General Safety certificate (e.g., from high school, another university, or a previous job), you can upload the PDF on Moodle for recognition.

Course 2 – Specific Training (Low Risk)

- **Requirement:** Mandatory for computer lab practicals and student part-time collaborations ("150 hours").
- **Format & Duration:** 4 hours, self-paced online course on Moodle; available in Italian and English.
- **Prerequisite:** You must have completed (or had validated) the General Safety Training first.
- **Certificate & Validity:** Final test on Moodle. Valid for 5 years.
- **Recognition Rules:**
  - ✅ Equivalent certificates from other Universities or Research Institutes are accepted.
  - ❌ Specific training certificates issued by high schools are NOT accepted.

Course 3 – Specific Training (Medium Risk)

- **Requirement:** Required for degree programs with access to technical/experimental labs with specific risk factors.
- **Modalità & Durata:** 8 hours, delivered via synchronous online sessions (Zoom) or in-person sessions (max 30 participants per class), in Italian or English.
- **Prerequisite:** General Safety Training completion/validation.
- **Certificate & Validity:** Final assessment. Valid for 5 years.
- **Recognition Rules:**
  - ✅ Equivalent certificates from other Universities or Research Institutes are accepted.
  - ❌ Specific training certificates issued by high schools are NOT accepted.

Next Steps and Useful Information

- **Action Items:**
  - Log in to the UniTrento Moodle platform.
  - Enroll and complete the General and Specific Safety courses.
  - Alternatively, upload previous valid certificates.
- **Badges & Certificates:** Passing the test automatically updates your status on UniTrentoApp. PDF certificate printing will be enabled in October (this delay will not block your lab access).
- **Official Web Page:** `https://www.unitn.it/en/study/enrol/documents-and-certificates/safety-training`
