PhD Days of Curriculum 7 Space Law Economy and Diplomacy

Program Overview & Leadership

The goal of Curriculum 7, dedicated to Space Law, Economy, and Diplomacy, is to serve as a training ground for future analysts of the evolving legal, economic, and diplomatic dynamics related to space activities, while allowing each doctoral student to maintain a specialization in one of the three sectors. The program also aims to provide an opportunity for doctoral students in other programs to discover or gain a deeper understanding of the evolving international political context in which their research is situated.

- **Coordinator:** Prof. David Burigana (University of Padua)
- **Vice-Coordinator:** Prof. Maria Gagliardi (Sant'Anna School of Advanced Studies)
